BOAT SALES
LAKELAND LEISURE ESTATES

Description

This brand new and unregistered 2026 62ft cruiser stern narrowboat offers a stylish new design, a spacious reverse layout and an impressive specification for comfortable cruising and extended stays aboard. Built and fitted out by Collingwood Boat Builders, the boat combines contemporary interiors with practical storage, generous living spaces and a strong electrical and heating specification.

The boat is powered by a brand new Barrus Shire 40hp diesel engine paired with a PRM 150 gearbox and currently has commissioning hours only. A Vetus 75kgf bow thruster makes manoeuvring easier, while approximately 800 watts of solar power, a 3kW Victron inverter and charger, an MPPT controller and Starlink 5G Wi-Fi provide excellent facilities for modern life afloat.

The spacious extended cruiser stern provides a fantastic outdoor social area and is protected by a full pram cover for greater usability throughout the year. Fully upholstered seating provides comfortable space for approximately six to eight people, making this an ideal place to relax with family and friends while cruising or moored.

The helm is equipped with a Morse controller and bow thruster controls, while two 230-volt sockets add further convenience. Three removable deck boards provide access to the engine bay and weed hatch below.

Entering from the cruiser stern, the reverse-layout design leads directly into a stylish and well-equipped galley. Contemporary quartz worktops create an attractive finish, while a generous selection of high-level and low-level cupboards, drawers and shelving provides plenty of practical storage.

The galley includes a surface-mounted three-burner gas hob and a full-size oven and grill, providing everything needed for preparing meals aboard. There is also a large microwave, a 12-volt refrigerator with freezer box and a full-size washer-dryer, making the boat particularly well suited to longer stays and extended cruising.

Moving forward from the galley is a comfortable, fully upholstered L-shaped dinette. This provides a dedicated dining and social space during the day and can be converted into a full-size double bed when additional sleeping accommodation is required.

Useful storage is incorporated beneath the seating, helping to maximise the available space without compromising the clean and comfortable interior. Together with the permanent double bedroom, the convertible dinette gives the boat accommodation for up to four people.

The saloon provides a comfortable and inviting space in which to relax, with two leather-style reclining chairs accompanied by matching footstools. A dedicated media unit incorporates a Smart TV alongside shelving for ornaments, books and personal belongings.

A Refleks diesel stove forms an attractive and practical focal point within the living space and provides additional warmth and character. A good selection of cupboards and shelving offers further storage while helping to maintain a spacious and uncluttered feel.

The walk-through bathroom has been designed to provide excellent facilities without compromising the flow of the interior. It features a ceramic pump-out toilet connected to an approximately 200-litre waste tank.

A full-size shower with two sliding doors provides a generous showering area, while the wash basin is positioned above a practical vanity unit. Additional storage provides useful space for toiletries, towels and other bathroom essentials.

Positioned towards the bow, the bedroom features a full-size double bed with useful storage underneath. A double wardrobe provides generous hanging space, while a corner storage unit and additional high-level cupboards provide plenty of room for clothing and personal belongings.

The bedroom leads towards the well deck at the bow and provides a comfortable and practical retreat at the end of the boat.

The boat has been designed with comfortable year-round use in mind. Cabin heating is provided by the Refleks diesel stove, while a Webasto diesel boiler supplies the central heating system through radiators and a heated towel rail.

With its spacious 62ft reverse layout, sociable cruiser stern, contemporary interior and comprehensive specification, this brand new 2026 narrowboat presents an exciting opportunity to become its very first owner.

From the approximately 800 watts of solar power and Starlink 5G Wi-Fi to the Refleks diesel stove, Webasto heating, Vetus bow thruster and generous onboard storage, the boat has been designed to combine the comforts of modern living with the freedom of life on the waterways.

This is a beautifully equipped new narrowboat that needs to be seen to be fully appreciated.

Additional Specs
